RedFlow Achieves ISO9001 Certification

RedFlow proudly announces ISO9001:2008 Certification for its Quality Management System. The company received Registration confirmation from British Standards Institution ("BSI") on 8 April 2010.

"It is the result of hard work and full support from all levels of staff," noted Chris Winter, CEO of RedFlow.

"With our design and manufacturing systems certified as meeting international standards, we are able to assure our customers and partners that RedFlow has the capability to provide quality products and the systems in place to continuously refine and improve our energy storage range".
