

Redflow Limited (Redflow)

Statement on Modern Slavery

Redflow designs and manufactures zinc-bromine flow batteries for use in the energy storage market, particularly to enhance the use of renewable energy. Redflow are headquartered in Brisbane, Australia and operates a company owned ISO9001 accredited manufacturing facility in Chon Buri, Thailand.

We affirm our role as participants in the global movement towards eradicating all forms of modern slavery. Modern slavery can occur in many forms, such as forced labour, child labour, domestic servitude, sex trafficking, workplace abuse and human trafficking. Redflow does not utilize any form of modern slavery within our company operations. We are committed to continued compliance with all applicable laws and standards in the markets where we operate.

As part of our manufacturing process, we procure goods and services from a variety of suppliers in countries around the world. We have long-standing relationships with many of our suppliers, founded on transparency and supply reliability. We do not tolerate any form of modern slavery in our supply chain. We seek to manage risks related to modern slavery within our supply chain through our internal procurement process and relationship with long-standing and reputable partners.

Within our own operations and within our supply chain, Redflow seeks to ensure that our labour and procurement practices are socially responsible and sustainable and that all our dealings are conducted with integrity, openness, respect and dignity. We will continue to review and improve our management processes to ensure that we keep meeting these standards.
